

YOUR PATIENT'S
safe and effective rehabilitation
is our priority

A proven medical device that safely and effectively stimulates deep tissue regeneration and relieves pain and inflammation.

Benefits Include:

Rapid Cell Growth

Laser light accelerates cellular reproduction and growth.

Faster Wound Healing

Laser light stimulates fibroblast development and accelerates collagen synthesis in damaged tissue.

Anti-Inflammatory Action

Laser light reduces swelling caused by bruising or inflammation of joints to provide enhanced joint mobility.

Reduced Fibrous Tissue Formation

Laser light reduces the formation of scar tissue following tissue damage from: cuts, scratches, burns, or post surgery.

Increased Metabolic Activity

Higher outputs of specific enzymes, greater oxygen and food particle loads for blood cells and thus greater production of the basic food source for cells, Adenosine Tri-Phosphate (ATP).

Increased Vascular Activity

Laser light induces temporary vasodilation increasing blood flow and oxygenation to damaged areas.

Stimulated Nerve Function

Slow recovery of nerve function in damaged tissue can result in "dead" limbs or numb areas. Laser light speeds up the process of nerve cell reconnection to bring the numb areas back to life.

ADVANCED HEALING POWER
for your patients

Theralase TLC-1000 Series Laser

WHAT OUR
customers are saying

"The Theralase Laser is the most effective technology we have ever used. Our players now rely on Theralase to keep them healthy and playing at their peak game."

George Poulis and Dave Abraham
Toronto Blue Jays Athletic Trainers

"The Theralase is my first choice of treatment for patients with arthritis of any joint as well as degenerative disc disease. I also recommend the Theralase for TMJ, carpal tunnel, tendonitis, and foot problems, such as plantar fasciitis."

Dr. Laurence Altshuler MD
Balanced Healing Medical Center

"The "Theralase Laser" has proved to be a sound and valuable asset to our practice that I would highly recommend."

Dr. Douglas Pooley
Pooley Chiropractic

theraLASE
Healing at the Speed of Light®

CUTTING EDGE

technology that rapidly heals tissue and is clinically proven to eliminate pain

Our current technology is unmatched in the industry. We penetrate further, heal faster, and provide intuitive functionality that anyone can easily learn.

Who Typically Uses Laser Technology?

MD's, DC's, DO's, DPM's, PT's, OT's, ATC's, RN's, DDS's, DVM's, LAc's and RMT's.

How Do Therapeutic Lasers Work?

Therapeutic medical lasers heal tissue ailments by injecting billions of photons of visible and invisible laser light deep into tissue structures. Tissue naturally contains protein strands called chromophores and cytochromes located in the mitochondria of a cell, which have the unique ability to absorb laser light energy and transform it into chemical energy for the cell. This chemical energy is utilized by the tissue on a cellular level to significantly accelerate the healing process and reduce pain in the body naturally.

There is an absolute increase in microcirculation, leading to higher rates of cell synthesis, and thus better tissue oxygenation and nutrition.

Is There Documented Clinical Proof?

Yes. Over 2,000 clinical studies worldwide have proven the success of therapeutic lasers in the healing of neural muscular-skeletal conditions. Theralase has performed a blinded randomized control study on chronic knee pain proving the clinical efficacy and safety of Theralase therapeutic laser technology and achieving FDA 510(k) approval.

FREQUENTLY asked questions

What qualifications are required to operate a therapeutic laser?

There are no qualifications required to operate a Theralase laser. Any one of your staff is more than qualified to provide effective treatment to patients under your diagnosis and direction.

Are there any harmful side effects?

No. Therapeutic laser treatment is a non-invasive healing technique that only utilizes harmless, yet effective light to stimulate deep tissue healing.

How deep into tissue can your laser penetrate?

A Theralase laser can penetrate up to 2" into your tissue directly and 4" into your tissue indirectly. The Theralase laser has the power to penetrate 5 times further than its closest competitor.

Do you offer financing or leasing?

Yes. We work closely with leasing companies in Canada and the USA. Please contact your sales representative for more details.

Is there a demand for laser treatment?

Yes. 55 million Americans annually suffer from chronic pain or chronic wounds. The best treatment clinically available for these patients is laser therapy. Put up a sign or advertise in your local newspaper and you will see the ongoing demand for Theralase laser treatment.

TREATABLE CONDITIONS FDA and Health Canada approved

Some Popular Laser Treatable Conditions include:

Low Back Pain

Neck Pain

Arthritis

Heel Pain

Tennis Elbow

Knee Pain

Tendinitis

Sprains & Strains

Carpal Tunnel Syndrome

Hip Pain

Wound Healing

and more...
